Environmental Impact Statement

APPENDICES

• [GO TO MAIN REPORT](#) 

A	Final Terms of Reference	Y-C	Environmental monitoring and reporting
B	Terms of Reference cross-reference	Y-D	Contingency plan for emergency environmental incidents
C	Regulatory framework	Y-E	Erosion and sediment control management plan
D	Consultation report	Y-F	Chemical and fuel management plan
E	Study team	Y-G	Land release management plan
F	Proponent commitments	Y-H	Significant species management plan
G	Corporate environmental policy	Y-I	Fauna management plan
H	Ecologically sustainable development	Y-J	Pest and weed management plan
I	Climate, natural hazards and climate change assessment report	Y-K	Noise management plan
J	Land use and tenure assessment report	Y-L	Waste management plan
J-A	Statutory framework	Y-M	Rehabilitation management plan
K	Land resources assessment report	Y-N	Decommissioning and abandonment management plan
L	Landscape and visual amenity assessment report	Y-O	Proposed environmental authority conditions
M	Traffic and transport assessment report	Y-P	Hydraulic fracturing risk assessment: compendium of assessed fluid systems
N	Surface water assessment report	Y-Q	Stimulation impact monitoring program
O	Groundwater assessment report	Z	Coal seam water management strategy
P	Air quality assessment report	AA	Land access
Q	Noise and vibration assessment report	AB	Offset strategy
R	Terrestrial ecology assessment report	AC	Social issues action plans
S	Aquatic ecology assessment report	AD	Plan of operations
T	Non-indigenous cultural heritage assessment report	AE	Water resource management plan
UI	Report on Matters of National Environmental Significance (ecology)	AE-A	Hydraulic connectivity characterisation
U2	Report on Matters of National Environmental Significance (water resources)	AE-B	Joint industry plan for an early warning system for the monitoring and protection of EPBC springs
V	Social assessment report	AE-C	Evaluation of prevention or mitigation options for Fairview Springs
W	Economics assessment report	AE-D	Stimulation impact monitoring program
X	Hazard and risk assessment report	AE-E	Ground deformation monitoring and management plan
Y	Draft environmental management plan	AE-F	Hydraulic fracturing risk assessment: compendium of assessed fluid systems
Y-A	Existing Santos GLNG environmental authorities	AE-G	Dawson River discharge scheme receiving environment monitoring program summary
Y-B	GFD Project environmental protocol for constraints planning and field development
